LEGIONELLA DOSSIER

LEGIONELLADOSSIER ENTERS THE UK MARKET WITH REVOLUTIONARY LEGIONELLA CONTROL SOFTWARE

LegionellaDossier is the market leader in Legionella control software in the Netherlands and has just 'landed' in the UK! The company was founded in 2016 and has been growing rapidly in The Netherlands ever since. At least 75% of Dutch LCA Members are partners.

LD-INSPECTION
RISK ASSESSMENT SOFTWARE

We created a tool to make it quicker and easier to conduct risk assessments. In fact, its offline app makes the process up to 50% faster and even allows your consultants to complete and generate their L8- and HSG274-compliant risk assessments on site.

LD-Inspection also eliminates the need for time-consuming paperwork back at the office, freeing up consultants to use their time more efficiently and streamlining your company's operations considerably. LD-Inspection then interfaces with LD-Control to generate all your Legionella control measures with just a tap of your screen.

'OUR SOFTWARE GIVES 75% OF DUTCH LCA MEMBERS A COMPETITIVE EDGE.'

LEGIONELLA CONTROL SOFTWARE LD-CONTROL

Legionella prevention & control is a complex field, involving labour-intensive procedures, time-consuming paperwork and repetitive tasks, such as flushing lines and taking temperature readings. That's why we developed LD-Control – an all-in-one digital logbook for all your buildings to help you and your clients monitor buildings, documents, tasks while remaining fully L8 and HSG274 compliant.

Our offline app eliminates the hassle of hard copy logbooks for evermore. It also provides clear, concise instructions for performing tasks and works in conjunction with a Bluetooth thermometer to ensure you take correct and accurate readings. What's more, it even checks off tasks automatically in your digital logbook as you complete them, giving duty holders real-time insights and clear, actionable management data. In short, LD Control gives you full control of your Legionella prevention duties.

SMART SENSOR SOLUTIONS
CLIP'R

Clip'R is a wireless IoT monitoring solution that eliminates the need to perform tasks manually. Instead, it automatically performs and records them to your digital logbook for you.

ONE-STOP SHOP
FOR LCA MEMBERS

LegionellaDossier works exclusively with LCA-certified organisations so that duty holders are assured the highest possible service levels. Drop us a line today or book a free online demo to find out more about becoming a partner or using LegionellaDossier's software.
